

Field Engineer

Etterbeek

Your role

As Field Engineer, you are LindaCare's main interface for our customers for the implementation of our products, whereby you apply your technical know-how for the actual installation and work with internal and external stakeholders for the integration with customer systems. In this position, you have the chance to interact with all parts of the company (during pre-sales, implementation and post-sales) and contribute to the development of the customer operations department.

This position reports directly to the Chief Operations Officer.

Your responsibilities

- ✓ You are responsible for the implementation of LindaCare software solutions, which can be on customer infrastructure or on our cloud infrastructure.
- ✓ You are the interface towards the customer during the implementation, and you interact with our software development team to integrate the LindaCare software solutions with customer systems.
- ✓ You provide training to the end-users upon installation of the product.
- ✓ You support the sales team in the pre-sales phase, based on your deep technical knowledge of the products.
- ✓ After implementation, you remain available to customers for further support.

Your profile

- ✓ Engineering degree in computer science or equivalent through experience, with strong hands-on technical abilities
- ✓ Experience in project management methodologies (eg Prince2)
- ✓ Excited to work in a fast-paced, intense, rapidly expanding company
- ✓ Ability to manage time well and meet multiple deadlines in a sometimes hectic environment
- ✓ Strong understanding of Information Security and Network Architecture, with system administrator skills, knowledge of virtualization and firewall configuration
- ✓ You are familiar with Mirth Connect and HL7 protocol
- ✓ You understand how a Java environment and web applications work
- ✓ You can set up and maintain MySQL and SQL Server databases.
- ✓ You are fluent in English and French, other languages are a plus. We operate in an international environment, so you have the ability to travel on a regular basis.

What do we offer you?

LindaCare offers, on top of a **complete compensation package** including **stock options**, an **exciting and challenging start-up work environment** where trust, recognition, ambition, freedom and joy are key values. Considering the fast growth of the company, LindaCare also offers **attractive career evolution perspectives**. Flexibility in working hours and location are key for a good work-life balance.

About us

LindaCare is a Belgium-based digital health start-up company specialized in the development of integrated tele-monitoring software solutions for chronic disease management. The initial focus of LindaCare are patients with chronic heart failure (CHF) and cardiac arrhythmia, equipped with Cardiac Implanted Electronic Devices (CIED) for Cardiac Rhythm Management (CRM).

LindaCare's OnePulse™ unified vendor independent software platform addresses the daily pain of cardiologists and nurses who have to manage hybrid tele-monitoring solutions from different implant vendors, and makes patient tele-monitoring significantly more efficient.

The solution will subsequently be extended to other chronic disease domains integrating a wide range of tele-monitored medical devices.
